- Can be accessed by all students at Coventry University.

Progress to date:

- WP4 – Diagnosis tools:
- Full literature review has been undertaken and completed.
- Baseline questionnaire developed and circulated to partners.
- Ethical approval sought and agreed.
- Student questionnaire to determine perception in the student population developed and data collected from Valencia and Coventry Universities.

Progress to date:

- Data analysis initial findings:
- 250 respondents – 165 Coventry, 85 Valencia.
- 112 male, 84 female, 1 transexual.
- 93 in age range 18-21.
- 109 under 22 (CU) 1 Valencia. 22 and over CU 51, 84 Valencia.

Initial findings indicate that perceptions of abuse differ across the two groups; for example:

- 82 respondents from CU felt that telling partner to shut up was either not at all or mildly abusive in comparison to 10 from Valencia.
- 57 respondents from CU felt not caring for someone who is sick was either not at all or mildly abusive compared to 7 from Valencia.

Data requires further analysis as wish to compare the influence of gender and age on the responses.
